

Angularapp

angular app for online test application in order to help the recruitment team take online tests of the candidates coming for interviews. user forms to answer some question ..

this app has 3 page :

- 1- Personal Information (with required field)
- 2- Education
- 3- Experience

to download angular

```
npm install -g @angular/cli
```

to download node file

```
npm install
```

I also use bootstrap to add navbar

to download bootstrap

```
npm install bootstrap
```

to run application

```
ng serve--o
```
