Form1 : personal information

The screenshot shows a web browser window with the address bar displaying 'localhost:4200/form1'. The browser's address bar includes navigation buttons (back, forward, refresh) and a search icon. Below the address bar, there is a navigation bar with four links: 'Greet Company', 'Personal Information', 'Education', and 'Experience'. The main content area displays a greeting: 'Hello [Your name], Welcome to our **Company** !'. Below this, there is a prompt: 'please fill all application and pages ...'. The form itself is a light gray box containing four input fields: 'First Name', 'Last Name', 'Email', and 'Password'. Each field is a simple white rectangle with a thin gray border. Below the 'Password' field is a blue 'Submit' button. To the right of the 'Submit' button, there is a message: ': You haven't send it yet'. In the bottom right corner of the form box, there is a small, faint thumbnail of the form itself.

It looks like you're using ngModel on the same form field as
formControlName.
Support for using the ngModel input property and ngModelChange event with
reactive form directives has been deprecated in Angular v6 and will be
removed
in a future version of Angular.
For more information on this, see our API docs here:
<https://angular.io/api/forms/FormControlName#use-with-ngmodel>

2nd form : education

A screenshot of a web browser displaying a form titled "Education". The browser's address bar shows "localhost:4200/form2". The form is part of a larger application, with a header bar containing "Greet Company" and navigation links for "Personal Information", "Education", and "Experience". The "Education" section contains four input fields: "degree", "Major", "College", and "YEAR". Below these fields is a blue "submit" button and a message: ": You haven't submitted yet".

Form 3 :Experience

The screenshot shows a web browser window with a single tab labeled 'App'. The address bar displays 'localhost:4200/form3'. Below the address bar is a navigation bar with four links: 'Greet Company', 'Personal Information', 'Education', and 'Experience'. The 'Experience' link is currently selected. The main content area is a light gray box containing three form fields, each with a label above it: 'Company Name', 'Postion', and 'Resone For Leaving'. Each label and its corresponding input field are enclosed in a light gray border. At the bottom of the form, there is a blue button labeled 'submitted' followed by the text ': You haven't submitted yet'.

The screenshot shows a web browser window with the address bar displaying 'localhost:4200/form3'. The page has a navigation bar with 'Greet Company' and three tabs: 'Personal Information', 'Education', and 'Experience'. The main content area contains a form with three sections, each with a label, an input field, and a validation error message:

- Company Name**: Input field is empty. Error message: 'company Name is required'.
- Postion**: Input field is empty. Error message: 'postion is required'.
- Resone For Leaving**: Input field is empty. Error message: 'Resone For Leaving is required'.

At the bottom of the form, there is a blue button labeled 'submitted'. Below the button, a message states: ': Your request has been submitted'.

Correct submit

The screenshot displays a web browser window at `localhost:4200/form3` with a form titled "Greet Company". The form has three sections: "Personal Information", "Education", and "Experience". Below these is a submission section with the following fields and values:

- Company Name:** `sgpc`
- Postion:** `porgramer`
- Resone For Leaving:** `another offer`

A blue button labeled "submitted" is visible, followed by the message: "Your request has been submitted".

The Chrome DevTools console shows a warning message from Angular:

```
Angular is running in development mode. Call enableProdMode() core.js:28039 to enable production mode. forms.js:1853
```

The warning text continues: "It looks like you're using ngModel on the same form field as formControlName. Support for using the ngModel input property and ngModelChange event with reactive form directives has been deprecated in Angular v6 and will be removed in a future version of Angular. For more information on this, see our API docs here: https://angular.io/api/forms/FormControlName#use-with-ngmodel".

Below the warning, the console shows a list of log messages:

Message	Source
